At the outset, Commissioner of Customs(Export) welcomed the members of Customs Broker Associations, Representatives of Airlines / Custodian present for the meeting.

AGENDA POINTS FOR MEETING

1. Improve Dwell Time for Export Clearance:

As per export clearance data retrieved from the system, it was observed that, bulk of clearance i.e. 75% of export clearance is completed in single block of 8 hrs i.e. 2.00 PM to 10.00 PM; 6.00 PM to 8.00 PM being peak time. Further, around 24% export clearance is completed in during the period 10.00 PM to 2.00 AM and 11.00 AM to 2.00 PM. It is also noticed that there is practically no work during the period 2.00 AM to 11.00 AM.

The Chair informed that too much work pressure during peak time leads to error resulting in delay in clearance in some cases there by causing inconvenience to trade. After explaining the above scenario, the Chair requested the participant to offer their comment / feedback / solution.

On this, MIAL representative informed that the vehicles are coming in only at 2.00 PM onwards. He also informed that there is restriction on heavy traffic movement due to which most vehicles arrive en masse, and though MIAL also works round the clock like Customs and also have labours during night time but in given situation they are helpless.

Representative from ACAAI mentioned about DG Cargo checking being allowed only after 2.00 PM as concerned staff is not available before that time. Further, most of the shipments of pharmaceutical products gets delayed due to late receipt of NOC from ADC, which is received only at 5.00 PM and later. It was suggested that depending upon submission time of the export documents, ADC may give NOC twice in a day i.e. around noon and evening.

On the issue of installation of Scanner for export consignments at Export Shed, the airline representative informed that if scanners are installed during carting of cargo it will speed up the loading in aircraft. Presently, the cargo can be screened only after examination as the present scanners are installed inside. The request was for installation of scanners as they presently installed in heavy shed where the goods can be loaded immediately after customs clearance.

MIAL informed that it is not possible presently.

The issue of ICES 1.5 getting slowed sometimes was also mentioned. The issue of CARR message (Export carting) was bought up and the general consensus was that MIAL had done some work on it and the problem is being addressed gradually.

2. <u>Optimum utilisation of Officers, providing sufficient officers during peak hours</u>:

The Chair informed the participant that based on general observation and data giving hour wise clearance of export consignments by Customs staff, the need of optimum utilisation of Officers is felt and accordingly it was decided unanimously to implement posting / deploy more officers to handle the increased work load during peak hours spread during period 2.00 PM to 10.00 PM.

It was also noted that present shift system / change of the staff during peak hours hampers the prompt clearance as officers are to log off from system and the incumbent officers logging in system / handing over taking over of charge etc. consumes precious time and causes delay in clearance.

Thus, it was agreed that common group of the officers will attend daily during working days and for the period 2.00 PM to 10.00 PM and batches with less numbers of officers will attend export related work with modified batch timing being 10.00 AM to 10.00 PM and 10.00 PM to 10.00 AM thereby ensuring availability of the staff round the clock and more staff during period 2.00 PM 10.00 PM.

Scanned with CamScanner

All the participants appreciated the initiative of revised and efficient work/ time management vis-à-vis staff strength.

The Chair further informed that AC/DC Shed then having more officers should provide sufficient staff for shipping bills which are selected by system for open examination or 100% examination keeping also in mind weight / number of packages / volume.

The Chair also emphasized that security be given priority and overcrowding be avoided at ACC.

The meeting ended with a vote of thanks to the Chair.

This is issued with the approval of Commissioner of Customs (Export), Mumbai Customs Zone III.
